> type user name MERLIN

> Data Source Name MERLIN

OK

FYI (you should not need to do the following on a new install)

The merlincfg64 file was created by using the following instructions steps 1-3\*\*\*

1. Open IBM DB2 > default copy >command Line Tools >Command Line Processor

2. Catalog the node:

```
>catalog tcpip node prod remote 10.5.10.180 server 50000 remote_instance db2puser  
system prod ostype aix
```

3. Catalog the database:

```
>catalog database merlin at node prod authentication
```
